Pondokgede, Bekasi City, West Java • otnielabiezer113@gmail.com • +6281284121608

Education

TELKOM UNIVERSITY

Bachelor Degree, Informatics. GPA: 3.62/4.00

Bandung, West Java

Jul 2018 - Dec 2022

Experience

ELICE

Korea-ASEAN Digital Academy Trainee

Cikarang, West Java

Sep 2025 – Nov 2025

- Developed the backend architecture for a MERN-stack web application (MongoDB, Express, React, Node.js) that analyzes thousands of Google Maps reviews through NLP sentiment analysis. Also integrated an AI-driven query interface that allows owners to analyze performance in natural language.
- Engineered a contextual AI Receptionist Chatbot utilizing Google Conversational Agents, automating user inquiries by integrating specific product and company data.
- Collaborated within a 6-person development team in a fully English-speaking environment.
- Achieved "Best Project" for the exceptional technical execution and a compelling final presentation.

PETA KEBIJAKAN

Data Scientist

Remote

Mar 2023 – Jun 2023

- Scraped hundreds of legislative data from dpr.go.id to fuel a Random Forest machine learning model predicting the progression of Indonesian Legislative Draft Bills (RUU).
- Engineered network visualizations to analyze similarities between the drafts utilizing Document Cosine Similarity which can also be used as a recommendation system.
- Maintained the company website using Laravel PHP and PostgreSQL database that was deployed in VPS.
- Collaborated remotely with cross-functional teams of legal experts and academic researchers to align data solutions with policy goals.

TELKOM UNIVERSITY

Research Assistant

Remote

Jul 2022 – Sep 2022

- Developed backend API functionalities for a web application using Python and the Django REST Framework to support a machine learning project for Kedaireka Nutrifood.

ID/X PARTNERS

Project-Based Intern: Data Scientist Virtual Internship Experience

Remote

May 2022 – Jun 2022

- Executed weekly data science milestones, covering everything from data cleaning and exploration to machine learning, to build a complete model for predicting credit risk.

Skills

Languages: Python, SQL, HTML-CSS, Javascript, PHP, Dart, Golang, Typescript, Java

Frameworks: Laravel, Flutter, NodeJS (React, Express), Django, Flask, Bootstrap, Tailwind, Tkinter

Data Libraries: Pandas, Numpy, Matplotlib, Seaborn, Bokeh, Panel, Plotly, Streamlit, Scikit Learn, Tensorflow, Keras, NLTK, TextBlob, Scipy, NetworkX, Statsmodels, Linearmodels

Areas of Expertise: Data Science, Data Analytics, Data Visualization, AI/ML, Full-stack Development (Web and Mobile), AI Automation, Network Analysis, Database and API, Quantitative Research, Cloud Deployment

Other Tools: Microsoft Office, Latex, Git and Github, Postman, Swagger, Trello, Linux, Draw.io, Github Copilot
